Bookshop packages

23 cards · 9 lines

Legend --> **Dependency** uses the one it points to ---- **Comment link** what a comment is about --> **Package import** sees the names of the one it points to: «import», or «access» kept private

--> **Package merge** takes in what the one it points to holds --> **Profile application** «apply»: the package may use the profile's stereotypes

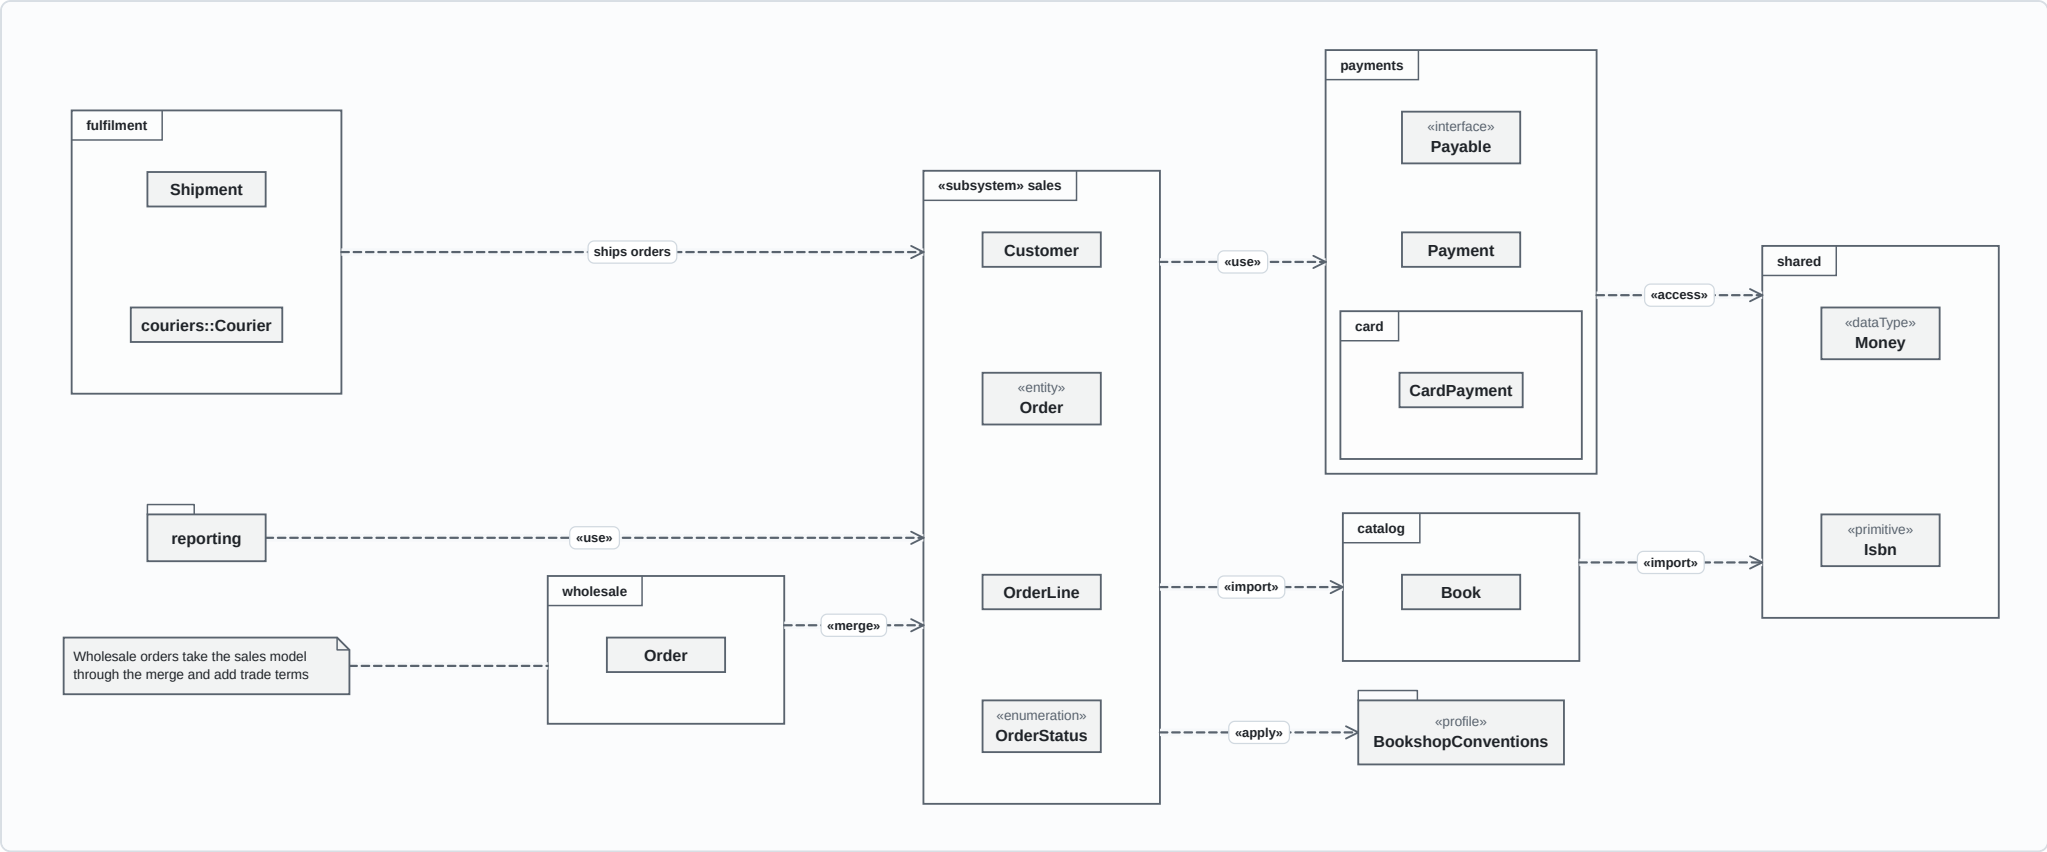

Bookshop packages (continued)

Elements 23

Card	Kind	Members
shared	Package	
Money	Data type	
Isbn	Primitive type	
catalog	Package	
Book	Class	
sales	Package	
Customer	Class	
Order	Class	
OrderLine	Class	
OrderStatus	Enumeration	
payments	Package	
Payable	Interface	
Payment	Class	
card	Package	
CardPayment	Class	
fulfilment	Package	
Shipment	Class	
couriers::Courier	Class	
reporting	Package	
wholesale	Package	
Order	Class	
BookshopConventions	Profile	
Wholesale orders take the sales model through the merge and add trade terms	Comment	

Lines 9
